COPLOW - TILTON ON THE HILL -NETWORK UPGRADE

2021-11-19 - Support Agent - Comments (0) - General

There will be continuous maintenance at our Coplow site today which will result in numerous outages in the day. The upgrade will migrate all users to our Tilton and St Georges service end points. This will reduce the service delay from 8Ms to 4Ms and reduce the amount of radios the service is delivered via.

Regards

Networks Team
