Eats Goscote Main Link Down

2021-07-28 - Support Agent - Comments (0) - General

The East Goscote main link is down, engineers attended site and installed a new used point to point link, but it seems to have failed again. We suspect the units are susceptible to rain flooding and lightening. Engineers will be onsite to install a new Gigabit link from 6:30 am to 9am, This may effect VoIP calls and other services,
