Flash Flood Warnings

2022-08-17 - Support Agent - Comments (0) - General

Please note that the current weather shift may result in some links slowing down or even dropping for periods of time. Where the radio network can generally deal with most rain, flash floods are raging torrents that are more heavy rain and faster and as such affect the signal transmission. We are reviewing links where we can put further support and back ups in on wekaer links.
