Intermittent Connection - 30/01/2020

2020-01-30 - Support - Comments (0) - General

Dear Customers

You may have been experiencing drop outs with your network connection. We have just been informed that the building next door to where we host our equipment and network links is currently on fire. The power has been moved over to a temporary connection so there maybe more drops outs until around 6pm today.

Kind Regards

Gigabair Support
