Major Network Disruption (Severity HIGH)

2022-03-12 - Support Agent - Comments (0) - General

We have been experiencing major network anomalies during the past week as a result certain sections of the network are being disconnected from the core service. We are now working with our vendors to identify the cause of the issues and request that any customers that have issues please put tickets in at <https://gigabair.deskpro.com/> which can be accessed via a mobile phone, we kindly request that you do not call engineers directly. We expect disruption over the weekend and will update our website at <https://gigabair.deskpro.com/news> periodically.

We apologise for the inconvenience
