Network Disruptions - Weather 14/11/2019

2019-11-14 - Support - Comments (0) - Network Outages

Dear Customers,

Today you may experience drop outs or lower speeds with your broadband connection, this is due to the heavy rain affecting the radio links. We are trying our best to make adjustments to the links to give you a more stable service whilst the weather is currently like this, hopefully your speeds will be back to normal soon.

Kind Regards

Gigabair Support
