Park Farm - Network Outage - 30/01/25

2025-01-30 - Support - Comment (1) - Outage

Dear Customers,

There is currently a network outage at Park Farm Mast affecting customers around this area. This is due to the core bonder at this site having blown resulting in a replacement to be installed. Our engineers are going to get a new one and should have everything back up and running in the next 2-3 hours once everything is configured and installed.

Kind Regards

XPON Support
