Park Farm Network Outage - Western Power Works 29/06/23

2023-06-29 - Support - Comments (0) - General

Dear Customers,

We have been informed that Western Power are going to be working on the power line in the Park Farm area. This will mean your network connection will be disrupted and you will face a network outage until this work is complete. Unfortunately this work is out of our hands but we are hopeful that the works will not disrupt the network for too long. We will keep you updated as these works are carried out.

Kind Regards
