ST Georges Tower - Major Network Outage

2024-10-08 - Support - Comments (0) - Outage

Good Morning

We seem to have a major outage at ST Georges Tower where our main links and data centre are affecting most customers. We are currently trying to investigate the cause of the issue and have recalled our engineers from the scheduled jobs they are on to look into this outage. They should be onsite in the next 30 minutes. We will give you an ETA once our engineers have arrived at site. We apologise for the inconvenience caused.

Kind Regards

XPON Support
