STGeorges Tower - Power Cut - WESTERN POWER 27/03/24

2024-03-27 - Support - Comments (0) - General

Dear Customers,

There is currently a power cut at St Georges Tower that has had a major impact on the network and caused a major outage, this is due to Western Power. We hope that the outage will only last 10 minutes or so. Our engineers are speaking with Western Power to try and get the service back up and running as soon as possible. We appreciate your patience and understanding whilst we get try to get this resolved.

Kind Regards
