STORM EUNICE

2022-02-18 - Support Agent - Comments (0) - General

We are expecting severe weather over the next 72 hours which will affect service and can potentially cause damage. Please be advised that no onsite support will be available for external cherry picker work until winds reduce. This may result in some clients losing radio access and broadband service.

We will continue to monitor services during the unprecedented and do whatever we can to maintain wind affected services.

Stay Safe
