STORM PIA - Severe Weather Network Disruption - 21/20/23

2023-12-21 - Support - Comments (0) - General

Dear Customers,

As you are aware the UK is currently being hit by Storm Pia with 80mph winds all over. This means that due to the weather conditions there will be disruptions to your network connection resulting in slower speeds or some outages until the storm passes. We will do everything we can to keep the service as steady as possible.

Kind Regards

XPON Wireless
