Weather Conditions - Slower 60G Wireless Connections - 04/12/23

2023-12-04 - Support - Comments (0) - General

Dear Customers,

Due to the current weather conditions the 60G Wireless links are being affected and you may experience slower speeds than usual. We are keeping an eye on the links and trying to keep them as stable as possible. We appreciate your patience at this time.

Kind Regards
