Weather Disruption - Network Outages - 07/12/23

2023-12-07 - Support - Comments (0) - General

Dear Customers,

Some of you may be experiencing slower speeds than usual or some small minor drop outs, this is due to the weather conditions degrading the quality of the radio links. We are keeping an eye on the links and trying to keep them as stable as possible until the weather has gotten better. We apologise for the inconvenience and appreciate your patience.

Kind Regards

XPON Support
